

DO YOU NEED COLLEGE CREDITS?

T.E.A.C.H. Early Childhood® has *NEW* Scholarship Models to Meet Student's Education Needs!

This year T.E.A.C.H. scholarships have been updated to reflect increasing educational costs and to better meet the needs of students by offering more flexibility in the number of credits taken per scholarship. These new scholarship models were developed with input from the T.E.A.C.H. advisory committee.

Licensing Model:

The licensing model is designed for child care teachers/directors and family home providers who wish to take ECE classes for licensing or credential purposes. This model offers 3-9 credits a year. The recipient has a six month work commitment after the classes are completed.

Associate Model:

This scholarship model is designed for child care teachers/directors and family home providers who wish to obtain an associate's degree in ECE. The model offers 9-18 credits a year. The recipient has a twelve month work commitment after the classes are completed.

Bachelor Model:

The licensing model is designed for child care teachers/directors and family home providers who are classified as juniors or seniors and wish to obtain a bachelor's degree in ECE. The scholarship model offers 9-18 credits a year. The recipient has a twelve month work commitment after the classes are completed.

For all three models, T.E.A.C.H. pays for 90% of the tuition and books. Scholarships also provide for paid release time, a travel/internet stipend and a bonus for successful completion of classes.
